

# NomoSense Platform

A unique solution for the management of your sensor park, networks and data.

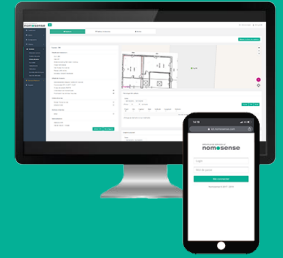

## Sensors

## Connectivites

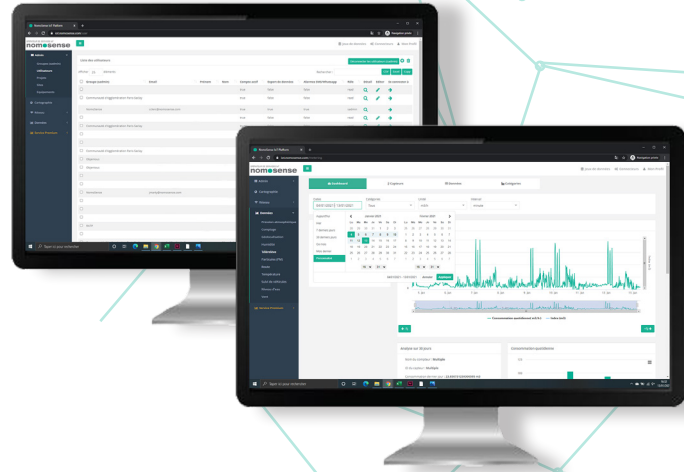

## Visualization

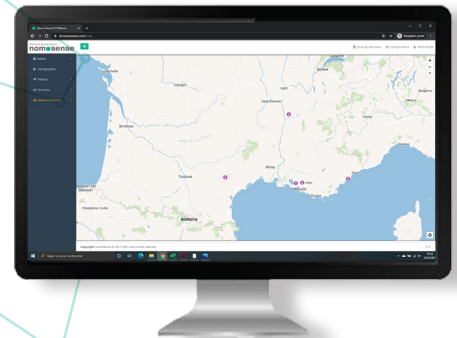

### A centralized management

- Manage each user's rights to apply maximum security to your data
- Easily manage your equipment and sites
- View, export and share your data to make better decisions

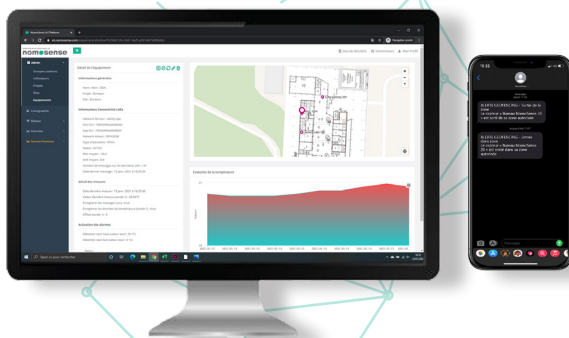

### A global view of the sensor park

- In the cartography section, find a global view of the positions of your sensors
- Monitor their operating states and/or latest measurements
- Import the plans of your buildings for an optimal rendering

### A live viewing of your data

- Configure your alerts to stay informed of all events
- Navigate through your data histories
- Thanks to our premium offers, receive SMS and/or Whatsapp alerts in addition to those sent by email.
